

# Research – delivering solutions

## Industry and Universities in partnership

Anson Jack

7 July 2010

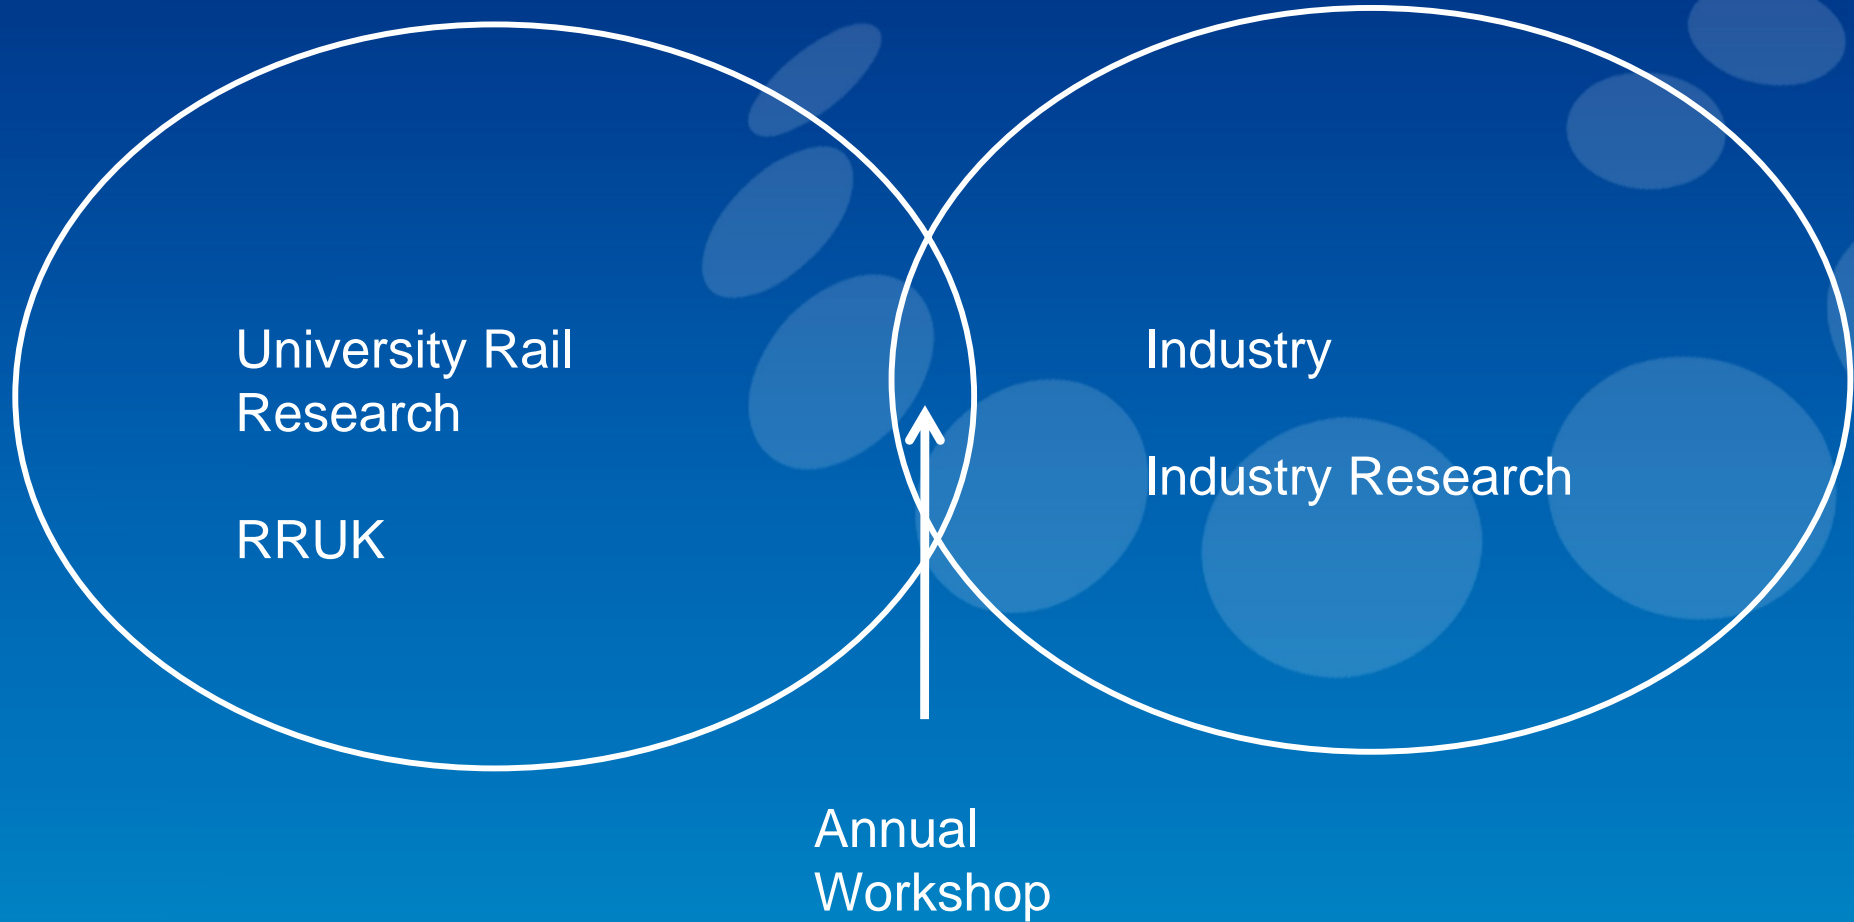

# 'Data to decision making' audit trail

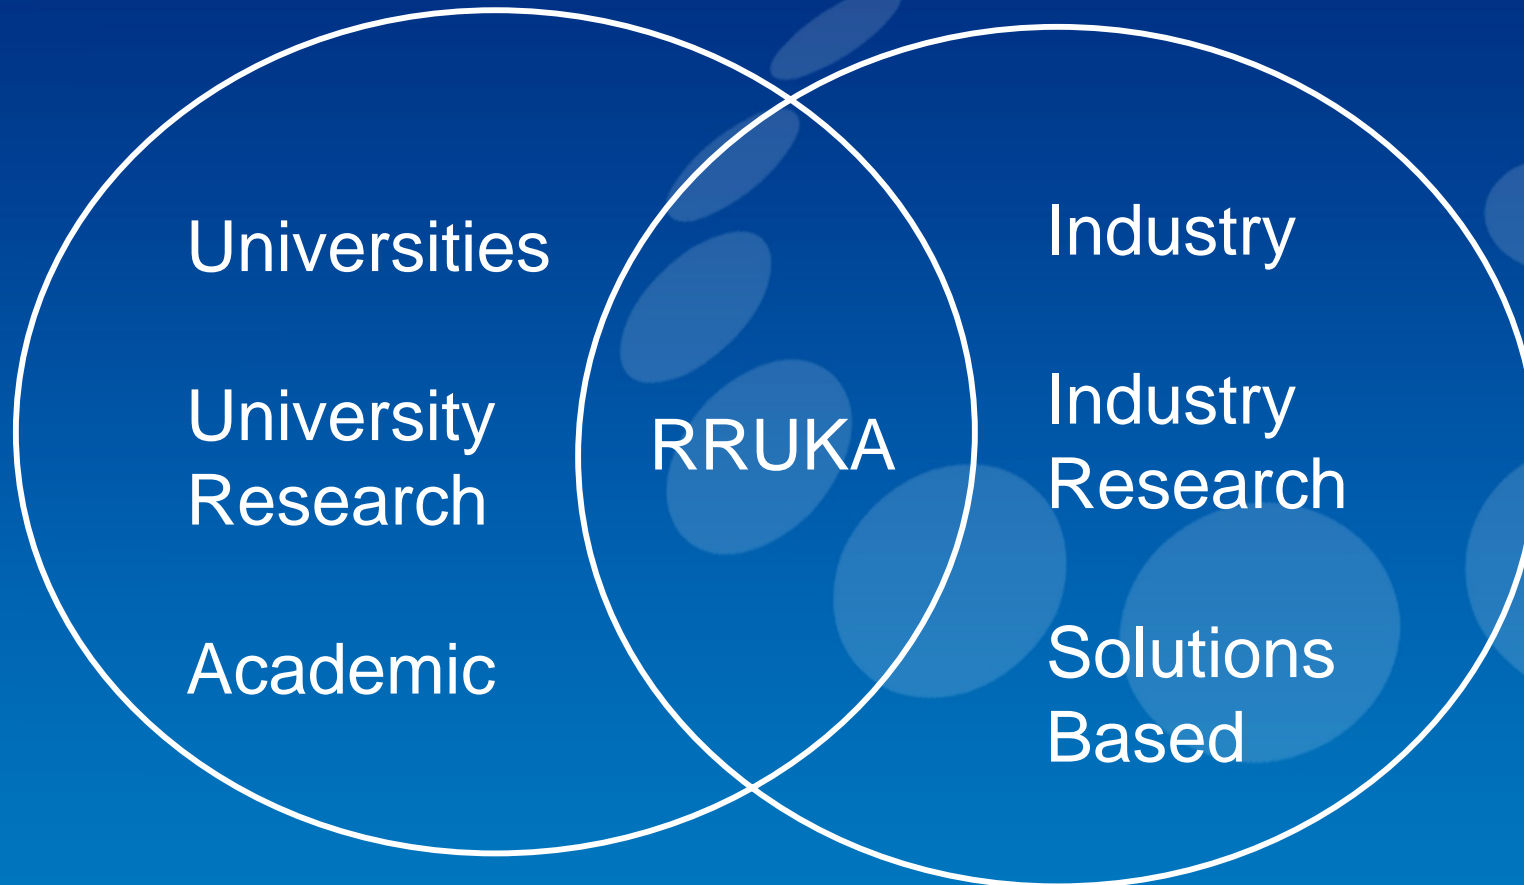

- Research forms part of industry problem solving
- RSSB manages two programmes – core and strategic
- Core is managing 200 projects
- Research at the ‘interfaces’
- Delivering solutions in the most efficient way possible
- Increasing cash constraints
- Maximise all funding opportunities

- RSSB is focused on finding solutions for industry in the most effective and efficient way possible
- We do not generally want to do research if we can find the answer to a challenge an easier or cheaper way
- It is worth putting time and resource into looking for answers/solutions/existing research before embarking on research itself

# RRUK – (from the industry)

# RRUKA – a new partnership

- Equal partnership
- Annual workshop
- Regular seminars and exchanges
- Communication about what is going on – TWO WAY and more current
- Focus for Industry support for research council bids
- Focus for University support for industry priorities
- Plugging in to industry and university knowledge management
- Led by universities and industry together
- Backed by RSSB for at least 3 years.
